

2017 - LAW ENFORCEMENT EMERGENCY PAC

STANDARD EQUIPMENT Includes:

- 10” Static Line Deployment
- CO2/N2 Inflation System with Oversized Buoyancy Tube
- Reversible Bi-Directional Floor
- Reversible Bi-Directional Ballast System
- 3-rung Boarding Ladder
- Interior Boarding Assist Line
- Perimeter Life Line
- Auto-Deploying Conical Drogue (Sea Anchor) w/ 20” Line and Anti-Fouling Swivel
- Light Reflective Segments
- Pressure Relief Valve
- Urethane Valise
- “Guaranteed for Life” Pelican Case

| WINSLOW Model # | Rated Capacity | Dimensions L x W x H | Weight |
|-----------------|----------------|-------------------------|-----------|
| 40LEEP | 4 | 18.5” x 15.25” x 6.875” | 23 pounds |

You're on scene . . . now what?

Law Enforcement Emergency Pac

The **Law Enforcement Emergency Pac** is the latest life-saving system from the WINSLOW LifeRaft Company, and is specifically designed to be carried on law enforcement helicopters, fixed wing aircraft, and in emergency service vehicles.

This is an *extremely* affordable piece of critical life safety equipment, and is a "*must have*" item to complete the inventory of every local, state, or federal law enforcement flight department. The issues of "size and weight" are no longer arguments for not having a life raft on board a helicopter or small fixed wing aircraft. This new LEEP system is *very* small and *very* light.

The remarkable *Air-Droppable Auto-Deployable* design capability means that flight crews can now provide critical assistance to *others* in any water related rescue operation. In the event of forced water ditching, they provide priceless security and protection to flight crews. And with a LEEP on board, you can now do *much* more than helplessly *observe* -now you can *render assistance*.

- Vessel fires, collisions, or sinking's
- Floods
- Drowning's
- Bridge jumpers

Anywhere people are around or in contact with the water, there exists the significant potential need for this remarkably light and compact lifesaving unit. Isn't saving lives what it's all about?

The actual life raft is an entirely self-contained unit packed within a valise. That valise is then packed into an indestructible, "guaranteed-for-life" Pelican case. The Pelican case provides *maximum* protection to the life raft in even the most abusive environments.

In an emergency, simply remove the **LEEP** from the Pelican case. You'll see that you now have *two* pieces of gear: a life raft ready for immediate deployment . . . *and an empty Pelican case* . . . into which you place your weapons, radios, and other equipment for *total protection*. The cases are *waterproof* and *float*.

Air droppable deployment is fast and easy: simply secure the end of the static line, hover between 40 and 50 feet, and slightly upwind of the target, and drop the **LEEP**. The static line is 10 feet long, so the **LEEP** will actually begin deploying before it even hits the water. The ballast system fills immediately, and the sea anchor deploys immediately as well. The **LEEP** is designed so that it is "bi-directional/reversible." No matter how it hits the water and opens, it is always available to board within 10 seconds.

The cases come in "safety yellow," with "tactical black" available on special order.

The **LEEP** system comes in a 4 person capacity, and provides an additional 50% overload capacity.

WINSLOW LifeRaft Company is the oldest life raft manufacturer in North America. We have long been a supplier to local, state, and federal law enforcement agencies, including U.S. Customs Service, the F.B.I., D.E.A., and N.O.A.A., to name just a few. With these new **LEEP** systems, any agency can now have the benefit of having "a WINSLOW on board."

And if you ever use the **LEEP** in an emergency, just write a letter attesting to the same, and WINSLOW will refill, repack, and return the **LEEP** to you *free of charge*.
